Creating an Enlightenment Bumper Sticker

The Enlightenment period was a time when individuals started to use Reason and Truth to lead their observations about the way the world was run.

For the first time, individuals began to question their place in the world and the rights they believe they possessed.

It is your task to use the ideas surfacing during the Enlightenment to create a bumper sticker design.

- Think about what ideas the Enlightenment stood for
- Think of bumper stickers or humorous sayings you have seen, and see if you can transfer that idea into something that makes sense

You will be graded on accuracy of content (does your bumper sticker convey an enlightened idea?), creativity, and overall aesthetic effort.
